Performance Genetics

2023 Merino Ram Sale

Monday 25th September | 220 Rams

'Springfield' Stockinbingal Rd, Cootamundra, NSW

Inspections start from 9:00am | Sale starts at 1:00pm

PRINCIPAL: New Kayaram PTY LTD

Cavan Station, Wee Jasper Rd, Yass, NSW, 2582

Office: 02 6227 9291

Email: cavanoffice@cavanstation.com.au

Matt Crozier: 0427 486 805

Email matt@cavanstation.com.au

Stud Manager: Mal Peake

'Springfield' 1679 Stockinbingal Road, Cootamundra, NSW, 2590

Mobile: 0408 426 103

Email: info@bogomerinos.com.au

Stud Overseer: Joe Walden

Mobile: 0427 306 239

Email: joewalden@bogomerinos.com.au

Agent: Phil Butt, Butt Livestock & Property

Mobile: 0417 411 105

Auctioneer: Paul Dooley

Mobile: 0458 662 646

Stud Advisor: Craig Wilson

Mobile: 0428 250 982

REBATE TO OUTSIDE AGENTS

5% rebate will be paid by the vendor to outside agents accompanying buyers to the sale and settling on their behalf within seven days of invoicing

Australian Sheep Breeding Values

The ASBVs presented in this catalogue can be found as a fold out in the middle of the booklet. They were generated by Merino Select in the analysis dated 07 September 2023.

An ASBV gives the most accurate indication of the genetic value of each animal. It takes into account not only the individuals own performance relative to its peers but also the performance of its siblings, other relatives, the heritability of the traits, whether it is a single or twin, date of birth and the age of its mother.

Selecting animals on ASBV data will give a more accurate reflection of the performance of the progeny of a sire than selection on phenotypic (raw) values

Definition of terms.

ASBV: Australian Sheep Breeding Value, see explanation above

YWT: Yearling Body Weight %, + is faster early growth, Heavier

AWT: Adult Body Weight %, + is heavier mature weight, - is lighter

YCFW: Yearling Clean Fleece Weight, + is Heavier cutting, - is lighter

ACFW: Adult Clean Fleece Weight, + is Heavier cutting, - is lighter

YFD: Yearling Fibre Diameter, - is finer, + is broader

EBRW: Early Breech Wrinkle, - is less wrinkle on the breech area

EBCOV: Early Breech Cover - is less wool on breech area

YFAT: Neg Fat animals produce leaner progeny

YEMD: +EMD animals produce animals with a higher meat yield

Indexes

The index value gives an indication of the overall genetic merit of the animal based on the ASBV's for each trait and the breeding objective (Index) selected. For each index the average is 100. The higher the Index value the quicker the animal will take you to your selected breeding objective.

The MPP_W Index

The main index we now use and will use going forward is the MPP_W index which better reflects the direction of our breeding program.

The MPP_W index is aimed at giving the following genetic response to the major traits in our breeding objective.

Trait	Predicted Response over 10 years
YWT: Yearling Body Weight	+8.9%
AWT: Adult Body Weight	+ 3.8%
YCFW: Yearling Clean Fleece Weight	+7.9%
ACFW: Adult Clean Fleece Weight	+4.4%
YFD: Yearling Fibre Diameter	- 0.2
NLW: Number Lambs Weaned	+ 7.6
EBRW: Early Breech Wrinkle	- 0.6

MP+: Merino Production Plus. Based on a production system whereby wether progeny are sold at 11–12 months. Balance between reducing micron, increasing fleece weight and early growth.

MPP_W: Our custom index which accurately reflects the Bogo breeding objective. See explanation above. Similar to MP+ index with the addition of reducing breech wrinkle whilst increasing fleece weight and early growth.

The raw fleece data (FDD, SD, CV, CF) based on wool samples taken from the midside of each animal in August 2023.

Body weights were taken on 26 & 27th August, with 24 to 48 hours curfew. The average body weight of the 600 rams weighed was 70kg.

Fleece weight measurements were recorded at shearing in mid April with 10 months wool growth and at 10 months of age.

FD: Fibre Diameter - average micron.

FDD: Deviation of the micron of the individual from the average of the test group. This year's group of 600 rams tested 19.1 therefore an animal with a FDD of -1.0 had a Fibre Diameter of 18.1 when tested in early August.

SD: A measure of the spread of micron of the fibres in a sample. Lower is better

CV: The spread of fibres in a sample expressed as a percentage.

CF: Comfort Factor. The percentage of fibres in a sample less than 30 micron, the higher the better.

BWP: Bodyweight expressed as percentage of the deviation from the group average with 100 being average. An animal with a BWP of 110 was 10% heavier than the average of the group.

CWP: Clean fleece weight percentage

GWP: Fleece weight expressed as a percentage of the deviation from the group average with 100 being average. An animal with a GWP of 110 cut 10% more wool than the average of the group.

BirthT: Whether the animal was conceived as a single (1) or a twin (2)

RearT: Whether the animal was reared as a single (1) or a twin(2)

Visual Scores

The 2022 drop rams have been scored for visual characteristics, the following table provides a brief explanation of how to interpret this data. Generally a score of 1 (one) is best and 5 (five) is worst, the exceptions being Hcks and FaceC where the ideal is a score of three and a score of one or five considered less desirable. As the animals have been assessed for these traits throughout their lives and they are forever developing and adjusting to the environment and management you should use this data in conjunction with your own appraisal of each animal. For further information and explanation of these visual traits please refer to the Sheep Genetics Visual Classing Guide.

Code	Trait	Score				
		1	2	3	4	5
Col	Wool Colour	White			Excessive	
Char	Wool Character	Well defined			No Crimp	
SStrc	Staple Structure	Thin			Blocky	
FIRot	Fleece Rot	Nil			Excessive	
Face C	Face Cover	Bare		Ideal		Excessive
Pigmt	Pigment	Nil			Excessive	
Ffeet	Front Feet	Ideal			Poor	
Bfeet	Back Feet	Ideal			Poor	
Hcks	Hocks	In		Ideal		Out

- The wool traits (colour, character, staple structure and fleece rot) were assessed in mid August with 4 months wool growth.
- Structural traits (Hocks and feet) were assessed in May.
- Where ever possible we employ trained contractors to undertake the visual assessments.

Col: Wool Colour

Char: Wool Character – Degree of crimp definition

SStrc: Staple structure – Staple size

FIRot: Degree of fleece rot and water stain present

Face C: Degree of wool growth on face

Pigmt: Degree of pigmentation on non wool growing areas

Ffeet: Shape & structure of the front feet

Bfeet: Shape & structure of the back feet

Hcks: Structure of the hocks

The measurements presented in this catalogue are intended as an aid to assist with your ram selection. Consideration should also be given to the important visual traits (conformation, constitution, type, wool quality etc) when making your selection decisions.

Test details

June/July 2022 drop

Machine Shorn mid April 2023

Current Test August 2023

4 months wool growth

(600 rams tested)

Average FD – 19.1 μ

Testing House:

Riverina Wool Testers (Laser scan)

Management

- Rams were fed a ration of Barley and minerals from early August.
- Vaccinated Gudair at lamb marking
- Drenched with Zolvix on delivery
- Vaccinated Weaning
- Click Zin Sept 2023 on Polls
- Dynamax capsule early August 2023.
- Booster 6 in 1 early August 2023

Opportunity Awaits.

The Peter Westblade Scholarship honors the Late Peter Westblade, a true visionary, passionate about breeding profitable sheep and a strong supporter of young people interested in agriculture.

The Scholarship and Wyvern Training Weekend exists to promote the practical skills associated with the sheep and wool industry and aims to deliver hands on experience and mentoring to young people aspiring for a career in this dynamic industry.

SCHOLARSHIP APPLICATIONS OPEN

OCTOBER 2023

Application process.

The Peter Westblade Scholarship application process is an important first step of the scholarship. It is important that you demonstrate initiative and commitment to a career in the sheep industry.

The written application is designed to give the interview panel an appreciation of who you are and what you aspire to do.

How you can apply;

- In writing by answering the questions in the application form.

Visit our website for more information.

Thankyou for your on-going support of Bogo Merinos.

SEMEN COLLECTION & MARKETING RIGHTS

Bogo Merinos Retains 50% semen share in every ram sold, unless negotiated otherwise.

GUARANTEE

It is important to us that you are happy with your purchase.

If you should encounter a problem with any ram you purchase within 12 months of the purchase date we will replace the ram with one of equal quality and value, or credit the full amount less GST against any ram you purchase from us at any sale venue we offer rams.

DISCLAIMER

The data provided in this catalogue is intended as an aid to assist with your selection decisions. Bogo Merinos accepts no responsibility for the accuracy or repeatability of the measurements, classing scores provided.
